EDUCATION

BS, Computer Science: Human & Computer Interaction Oregon State University *Corvallis, OR | June 2026*

- Applied option in Human-Computer Interaction (HCI)
- Relevant Coursework: Website Development, Mobile Software Development, Senior Software Engineering Project, Databases, Data Structures, Computer Architecture, Operating Systems, Introduction to Security, Open Source Software, Cloud Computing
- Committed 20 hours per week towards remote internship while completing degree

EXPERIENCE

Software Engineer, Frontend HireScore *Remote | June 2026 – Present*

- Own frontend architecture decisions for key features on a production assessment platform, ensuring scalability and maintainability
- Lead refactoring initiatives across multiple pages to improve code quality and long-term maintainability
- Partner with backend engineers to navigate PHP/Symfony integration points, ensuring frontend changes align with existing systems
- Manage feature development through full PR review cycles, incorporating senior engineer feedback to ship production-ready code
- Maintain development environments using Docker and Git, troubleshooting issues to keep the team unblocked

Full Stack Developer Intern HireScore *Remote | July 2025 – June 2026*

- Built and maintained responsive, user-friendly web components using React, JavaScript, and Mantine, contributing to a polished and consistent user experience
- Worked across the full stack using PHP, MariaDB, and Linux, contributing to backend features and database-driven functionality
- Deployed and maintained application services using Docker, ensuring consistent environments across development and production
- Collaborated closely with designers to integrate UI libraries, improve form validation, and streamline workflows

Software Engineering Project Team Lead Oregon State University *Corvallis, OR | Sep 2025 – Jun 2026*

- Led a team of 4 developers to architect and deliver NurseSim+, a full-stack gamified clinical simulation platform for OHSU nursing students
- Built the tutorial system and curriculum progression locking from scratch, including rebuilding the entire system after a mid-project tech stack pivot from Ren'Py to TypeScript/Python
- Designed and implemented the public-facing marketing landing page, in-app course selection UI, and onboarding question interface
- Validated clinical curriculum content with nurses and OHSU faculty advisor Kirsten Buffa

Medical Records & Imaging Technician Valley Eye Care *Corvallis, OR | Jan 2021 – June 2023*

- Developed and maintained a local storage system for patient eye scan images and RX documents
- Worked with EHR and EPM systems for patient database management
- Handled sensitive medical data in compliance with clinical privacy requirements

Barista Dutch Bros Coffee *Corvallis, OR | July 2023 – June 2025*

- Collaborated with team members in a fast-paced, high-intensity environment to ensure timely and accurate preparation of beverages and food items
- Developed strong interpersonal communication skills through daily interactions with a diverse range of customers, providing excellent customer service and enhancing guest experiences.
- Adapted quickly to changing demands and worked under pressure during peak hours, contributing to a well-organized and productive workspace.

Lead Curriculum Developer Oregon State University *Corvallis, OR | Sep 2021 – Feb 2022*

- Participated in a CS research project under Professor Jennifer Parham-Mocello focusing on educational curriculum development
- Developed curriculum for middle school students to learn the BoGL programming language
- Collaborated with a multidisciplinary team to revise curriculum to meet educational standards
- Handled sensitive medical data in compliance with clinical privacy requirements

PROJECTS

NurseSim+ - Gamified clinical simulation platform built for OHSU nursing students

- TypeScript, Python, React, PostgreSQL, Next.js
- Built tutorial system, curriculum gating, landing page, and question interface

github.com/NurseSim/NurseSim

PC Building VR Museum - VR experience teaching the history and evolution of computers

- Unreal Engine 5, C++, Blueprints
- Built during upper-division coursework at Oregon State University
- Designed a VR museum walking users through the evolution of computers, from early mainframes to modern desktop hardware
- Developed an interactive capstone lesson teaching users how to build a desktop PC, reinforcing concepts from the historical exhibits

https://github.com/Halei-6103/VRMuseum

Efrain Landscaping LLC - Single-page marketing website for a local Corvallis business

- Next.js 16, React 19, TypeScript, Tailwind CSS v4, Framer Motion, GSAP, EmailJS
- Built full marketing site with animated card slideshow, services section, testimonials carousel, and a contact form integrated with EmailJS for estimate delivery
- Included JSON-LD LocalBusiness schema and Corvallis-focused metadata for local SEO

SKILLS

Languages: TypeScript, JavaScript, Python, C++, HTML, CSS, SQL, PHP, C#, Kotlin, GDScript
Frameworks: React, Next.js, Node.js, Flask, PHP, Symfony
UI Libraries: Mantine, Tailwind CSS, shadcn/ui
Databases: PostgreSQL, MySQL, MariaDB, Supabase
Tools: Docker, Git, Vite, Figma, Unreal Engine 5, Android Studio, Linux
Platforms: Google Cloud Platform (GCP), Google App Engine, Cloud Run, Unreal Engine 5, Godot
Other: Prisma ORM, REST APIs, EHR/EPM systems
